

# USER SEGMENTATION & ENGAGEMENT ANALYSIS

Understanding How Feature Adoption  
Relates to Engagement & Retention.

# OBJECTIVE & BUSINESS QUESTION

## Objective

Understanding how feature adoption relates to engagement and retention

## Dataset Overview

- Dataset: ~25k activity records
- 1,757 users
- July–November
- Internal users excluded

# EXECUTIVE SUMMARY

**USERS ANALYSED**

**1,757**

**AVG  
TRANSFORMATIONS**

**48.7**

**AVG DAILY ACTIVE  
USERS**

**136**

**AVG RETENTION**

**67%**

## KEY FINDINGS

- Multi-feature users retained almost 2x better than single-feature users
- Research emerged as the most-used feature overall
- SMEs showed slightly higher retention than Enterprise users
- Largest adoption drop off occurs before users reach full multi-feature adoption

# PLATFORM ACTIVITY OVERVIEW

## Observations

- Average DAU: 136
- Peak DAU: 248
- Lowest DAU: 3

## Insight

Weekend activity consistently dropped, suggesting the platform is primarily used within professional workflows.

# RETENTION TREND

## RETENTION RATE%

### Assumption

- Users active in Month N and Month N+1 were considered retained
- Users returning after skipping a month were classified as churned.

# SEGMENTATION APPROACH

| Segment              | Users | %     |
|----------------------|-------|-------|
| Single-feature users | 623   | 35.46 |
| 2-feature users      | 626   | 35.63 |
| Multi-feature users  | 508   | 28.91 |

Users were segmented based on the number of platform features used.

● Avg Days Online    ● Avg Transformations

## ENGAGEMENT FINDINGS

Engagement increased consistently with broader feature adoption. Multi-feature users were active on more days and performed substantially more transformations than other user segments.

# RETENTION BY SEGMENT

● Avg Retention %

Multi-feature users retained at nearly twice the rate of single-feature users.

Broader feature adoption is strongly associated with higher retention.

# ORG TIER ANALYSIS

Retention was broadly similar across commercial tiers, with SME users showing slightly higher retention than Enterprise users.

# FEATURE DOMINANCE BY ORG TIER

| Org Tier   | Research | Draft | Project | Dominant feature |
|------------|----------|-------|---------|------------------|
| Enterprise | 5022     | 4606  | 1884    | Research         |
| Mid Market | 2833     | 2594  | 728     | Research         |
| SME        | 1980     | 2811  | 853     | Draft            |
| None       | 1090     | 576   | 520     | Research         |

Research was the dominant feature across most organisation tiers, while SMEs showed a stronger preference for Draft.

# FEATURE USAGE PATTERNS

Research and Draft were the most heavily used platform features, while Project usage was significantly lower.

# RECOMMENDATIONS & NEXT STEPS

## Target Single Feature Users

### Finding

- 36% retention
- Lowest engagement segment

### Action

- Feature discovery prompts
- Guided onboarding
- Workflow tutorials

### Expected Impact

- Increased feature adoption
- Higher retention

## Expand Two-Feature Users

### Finding

- 54% retention
- Already engaged with multiple workflows

### Action

- Recommend the third feature contextually
- Cross-feature templates
- Workflow suggestions

### Expected Impact

- More multi-feature users
- Increased stickiness

# RECOMMENDATIONS & NEXT STEPS

## Research as an Activation Feature

### Finding

- Most-used feature overall
- Most-used feature among multi-feature users

### Action

- Introduce earlier in onboarding
- Promote Research-based workflows

### Expected Impact

- Faster engagement
- Broader feature adoption

## Tailor Experiences by Customer Segment

### Finding

- SMEs prefer Draft
- Enterprise & Mid-Market prefer Research

### Action

- Segment-specific onboarding
- Personalized feature education

### Expected Impact

- Better adoption across customer types

# FOLLOW UP ANALYSIS

**01**

## **Feature Adoption Journey**

Identify where users stop expanding feature usage

**02**

## **Organisation Adoption**

Identify whether retention is driven by individuals or company-wide adoption

**03**

## **Cohort Retention**

Determine whether retention is improving over time

**THANK  
YOU**
